

Our mission is to provide the highest quality service and a staff specially trained to respond to your unique situation. Please contact AAS Restoration, Inc. with your questions about the use of the Esporta Wash System.

Esporta Wash System

Restoring damaged property versus replacement can mean a savings of nearly \$5,000 in a fire or water loss. AAS Restoration is dedicated to restoring as much property as is feasible in all losses, and as such has become a licensed vendor of the Esporta Wash System.

The Esporta Wash System is the disaster restoration industry's only wet-wash machine designed exclusively to recover "soft contents" damaged in fire and water disasters. Soft contents include items such as footwear, linens, outerwear, leathers, bedding, outdoor items, athletic equipment, survival gear, sleeping bags, life jackets, stuffed toys, and most personal clothing. The patented system breaks down unwanted organic materials and kills bacteria, viruses, and mold spores on contact. The system also removes organic and inorganic contaminants without degrading or damaging the materials. It is five times more effective than traditional front-loading washing machines. The Esporta Wash System has been scientifically proven to eliminate 99.9997% of most contaminants, including heavy smoke, soot, mold, and sewage.

Benefits

- Restores 85% of soft contents damaged by smoke, soot, and water to pre-loss condition
- Restores 85% of category 1, 2, and 3 flood-damaged soft contents to pre-loss condition
- Effectively removes smoke odor, grime, bacteria, mold, fungus, and foul odors
- Eliminates all risks of cross contamination during the cleaning process
- Reduces cleaning costs by eliminating the need for ozone treatment or hand cleaning
- Saves insurance companies millions of dollars in replacement costs by diminishing the number of items deemed a total loss and cashed out, and by significantly reducing labor costs
- Minimizes impact on the environment, reducing the amount of total-loss property sent to landfills
- All cleaning agents are "green"

An added benefit of the Esporta Wash System is the use of the technology in the cleaning of fire-resistant Personal Protective Equipment (PPE) and of sports gear without causing deterioration of the fabric, reduction of the coefficient of the reflective materials, or damage to the hard goods. The Esporta Wash System is approved for efficient and effective cleaning of boots, ropes, backpacks, helmets, pads, and other hard-to-clean ensembles.
